DETAILED ACTION

This is the first Office Action for the serial number 09/694,458, Shock and Vibration System, filed on 10/23/00.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent # 4,471,935 to Chiba et al.

Chiba et al. teaches a shock and vibration system (10) comprising a first member (12,16) having an interior space and a second member (18) being positioned interiorly with respect to the first member. The system comprises a plurality of elastomeric shock mounts (20) having a first end connected to the first member and a second end connected to the second member. The first member is fixedly mounted (col.2, line 51-53). The second member is fixedly mounted (figure 4). The first member circumferentially surrounds the second member.

Allowable Subject Matter

Claims 5-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 09/694,458

Art Unit: 3632

Claims 12-18 are allowed.

In regard to claims 5-8, the prior art fails to teach the first member comprises a platform extending radially outward from the pole. In regards to claim 9, the prior art fails to teach the first member comprising a plurality of storage compartments extending radially outward from the pole. In regard to claims 10-11, the prior art fails to teach the second member has a chamber with a platform therein with the platform coaxially positioned with respect to the first member. In regard to claims 12-18, the prior art fails to teach the shock mounts cantileverly extending between the second member and the first member to provide cantilevered support thereto.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

US Patent # 4,233,980 to McRae et al.

US Patent # 5,031,885 to Schwerdt

US Patent # 2,924,420 to Fink

Fink teaches anti-vibration mount. McRae et al. and Schwerdt teach a rubber sleeve.
